

Terms & Conditions and Copyright Notice

Thank you very much for your purchase of my files!

I have put a lot of time and effort in the designing and test cutting of my files for your personal use. I hope you enjoy using them as much I have enjoyed designing and using them! Please note that these files are copyright © Christine Rain, Keepsakes by design, 2007/9 and by purchasing these files, you are obtaining a license to use them for **personal and non-commercial use** only and only the original purchaser has the right to use the product in their own personal layouts and/or projects. You **do not** have permission to sell or share the files themselves. This means that you may not redistribute which includes, but not limited to; copying, lending, duplicating, printing, re-selling) either the products or their content.

You may:

- Use these designs for your own personal layout/project.
- Resize or change these designs for your own personal project.
- Submit your layouts online or for publication using these graphics as long as credit is given to me as the designer.
- You may make Cards and other hand-crafted items, such as 3D models, Envelopes, Gift Boxes & Bags etc with the templates you've purchased from 'Keepsakes by Design' and offer them for sale or donate them to a charity for them to offer for sale only in accordance with the attached "**ANGEL POLICY**".

If you make something especially wonderful, please consider sending me a photograph, as it's always lovely for me to see how my products are used and I will, with your agreement, publish on my website gallery pages.

Please do NOT:

- Use these graphics for web templates or web design.
- Change the file **in any way** and claim it as your own.
- Resell or redistribute any file, through the internet, CD or sharing through e-mail or other method whatsoever.
- Produce die cuts to be sold on the internet, eBay, other site or other method whatsoever.
- Print out items and sell them as printed sheets/templates

You must personally create or handcraft the items you wish to sell. Items produced by any hired employees for the purpose of profit are NOT allowed.

If you experience a problem with any of my files please contact me so I can help resolve any issues and feel free to contact me at any time with any questions regarding file usage or cutting instructions.

Thank you again!

Chrissie (Rugersmum)

General Instructions

All of my designs include four different formats. Please note that you have purchased the rights to these files. You must not transfer these rights to others, even though you are not going to use all the file types.

File Format/Type

- GSD format ~ to use with Wishblade, Robomaster, Silhouette and other suitable software.
- WPC format ~ to use with Pazzles, Funtime, WinPCSign software and its successors.
- AI format ~ can be used with Photoshop, coral draw and be imported into other suitable software.
- KNK format ~ to use with the Klic n Kut cutting machine.

General information for all of my files:

Some of these files take several minutes to cut due to the number of lines. Depending on age and condition of your blade and mat, you may be able to cut the file at a somewhat smaller size. I do not recommend resizing any of my Mesh/lattice files to a drastically smaller size as due to the intricacy of these files it could result in the loss of detail and miss-cutting.

To use the files, first open the cutting /software program for your machine. Then, just select the file you wish to use by going to **FILE > OPEN**, and then browsing for the folder where you have saved the file. Then, browse for the file format for the software that you are using. Double click to open the file. (Not all formats allow you to just double click to open them for instance the WPC format open by double click in Windows Explorer.)

Important

All lines shown as **DASHED** are meant to be cut as a dashed line **unless I have indicated otherwise**.

In some instances & in the interest of the design you may see the cutting lines extend beyond the cutting area & you will need to cut these last pieces manually with a paper trimmer, it is also important that you place your card/paper carefully and accurately.

General GSD information for all of my files:

If a file is shown with more than one coloured line and you wish to cut one line colour at a time, just go to **OUTPUT SETTINGS > CUTTING SETTINGS > CUTLINE SETTINGS** and place a tick next to the line colour you wish to cut, load your paper and cut. Repeating with the other line colours and different coloured paper until all colours/pieces are cut.

Individual components (i.e. words, centers of letters, numbers, Mesh/lattice cutting lines, etc.) have usually been grouped together for ease of resizing. To increase the cutting size of the files in the WB/RM software, click to select the entire file or section desired and drag the corner to resize ensuring you keep proportion. I test cut my Mesh files on my CraftRobo at a speed of 5/6 (out of 10 maximum) and my other, less intricate files at a 7- 9.

Please make sure you set the dashed (fold) and cut lines correctly – I mainly use 1.3mm cut segment and 3.8mm spacing (**OUTPUT SETTINGS>CUTTING SETTINGS>CUTLINE SETTINGS**)

General WPC information for all of my files:

The lines in the WPC files are usually all grouped together. In order to break the lines apart, you need to click the required part of the image to select it, and then click **SHAPE>BREAK GROUP**. I usually cut the dashed lines first using the following settings KissCutx2 - Blade = 1

General KNK Information:

Open up your KNK program and then navigate to the file that you are wishing to cut. Please make sure that when you are cutting any file that has dashed lines, they need to go to **CUT>PLOTTING DEFAULTS**, and set the pounce feature also make sure that their file is set as **SIGN BLANK**. (You only need to do this for the sections that are meant to be cut with detailed dashed lines inside the cut. For all other cuts, if you use the **PAGE** setting, then you can cut your piece at the point where you set your origin, saving paper!)

Puzzles, Funtime, or WinPCSign users go to the Cutting Panel in the center of the top tool bar and click on the icon that looks like a cutting blade. Click on the color you wish to cut from the paper currently in your cutter. If you wish to select more than one color, hold the Shift key down while selecting all of the line colors you wish to cut. Set the pressure and cutting speeds in the appropriate windows in the Cutting Control Panel, and click on Start when you are ready to begin cutting.

Wishblade and CraftROBO users need to select cut lines by going to **FILE>OUTPUT SETTINGS**. Then click on the Cutting Settings Tab, and select Cutline Settings. Click on the line color(s) you wish to cut. If you want to cut any of the lines as dashed lines, click on the arrow to the right of the colors to select dashed lines.

Illustrator Bridge: If you are cutting directly from Illustrator using the Illustrator bridge then you need to go to **FILE> WISHBLADE**, and choose settings, or **FILE>CRAFTROBO** and choose settings.

From Puzzles to CraftROBO: To cut using directly from the Puzzles software to your CraftROBO, use **FILE>PRINT**, and select your cutter as the printer. Select Preferences and choose the desired settings from that window.

PLEASE -Make sure you check your cut line settings before cutting!

License and Angel Policy Agreement

(Effective 1st September 2008.)

Dear 'Keepsakes-by-design' Customer,

To maintain fair play, we have put in place this License and Angel Policy. Please do your part and show your support by complying with this agreement. Prior to selling items made with "Keepsakes -by-design" templates you will need to read the following completely.

1. All 'Keepsakes -by-design' designs, patterns and templates are copyrighted by Christine Rain and are protected under international copyright laws, which mean that they cannot be copied without the written permission of 'Keepsakes-by-design'.
2. The License and Angel Policy of "Keepsakes -by-design" grants limited permission to purchasers of our products, designs, patterns and templates to create only 3-dimensional handmade artworks for sale with the limit of 50 sales of the finished handmade artwork per design, pattern or template per year. That means that each of the 'Keepsakes-by-design' template boxes and designs may only be sold **50 times** under this policy within any one calendar year.
3. "Keepsakes -by-design" does not limit the types of handmade creations that may be sold under this policy, as long as within good taste and reasonable standards.
4. Any artwork to be sold must not incorporate third-party copyrighted material. The artwork must contain only "Keepsakes -by-design" designs, patterns and templates and the creator's original art.
5. The following notice must appear on handmade artwork created for resale: "**Template and design by 'Keepsakes-by-design.com ©**".
6. Artwork for sale may not be produced through production line efforts where individuals other than the seller are engaged or employed in the production of the product to be sold, whether for hire or not. Nor may "Keepsakes -by-design" designs, patterns and templates be mechanically reproduced.
7. "Keepsakes -by-design" images, designs, patterns and templates may not be used in any electronic media including the use of clip art in any computer or reproduction environment or related use. The distribution of "Keepsakes -by-design" designs in electronic form is prohibited and is a violation of the copyright.
8. Handmade creations may be sold at craft fairs, bazaars, fundraisers, or school fairs. However, handmade "Keepsakes -by-design" creations cannot be sold at a fixed retail location such as a store or mall kiosk, etc.
9. The purchaser agrees not to sell, transfer or give the rights of 'Keepsakes-by-design' designs, patterns or templates to anyone else. Nor may they sell the designs, patterns, templates, or the finished products to other vendors for resale purposes.
10. Persons creating handmade items for sale are solely responsible for complying with any country, state and local business and tax regulations.

'Keepsakes-by-design' may amend its policies governing the use of its copyrighted designs and images, including the License and Angel Policy, at any time. Amendments to such policies are effective at publication unless otherwise noted and will be posted on the 'Keepsakes -by-design' website. 'Keepsakes -by-design' reserves full rights to deny or terminate permission to use 'Keepsakes -by-design' designs, patterns or templates with respect to any particular person.
